

WORKBOOK 2020-2021

#### SEASON 2020-2021

#### This season will be SUPER!

Welcome to a new season in which we have made bigger changes to our collection than ever before. For the first time in over a decade we are releasing our stick lines in new categories based on the shafts instead of the blades. This new setup offers great possibilities for the players to get exactly the stick that they want, both in terms of blade choice and shaft technology. The brand new stick lines **SUPERSKIN** and **SUPERSHAPE** will guarantee that everybody will find what they are looking for. As the cherry on the cake we are also releasing the new ICONIC blade, a top modern floorball blade with fantastic qualities for shooters as well as for playmakers.

Our shoe range continues to grow as well. This year we are releasing a completely remade version of our popular **U5 PRO MidCut** model, with a knitted upper in very durable materials and a kickass design. Check it out!

We have never been more excited to get the new season started, and we hope you feel the same.

UNIHOC.COM

# 

This year we are introducing a completely new technology for our elite sticks in the straight shaft lightweight category. We call it SOLID BALANCE TECHNOLOGY, and it makes it easier than ever to choose the perfect stick.

SUPERSHAPE is our new line of optimized lightweight sticks, giving you a wide range of options to choose exactly which weight and balance you prefer for your stick. This is also the first time that you have the option to pick your favorite blade as well, and get the perfect combination. The new system is called **SOLID BALAN-**CE TECHNOLOGY and our goal is to give you perfectly balanced sticks in all weight categories without sacrificing stability, strength and quality. Key words that have always been extremely important for UNIHOC.

#### MULTILAYER STRUCTURE

The new MULTILAYER INTERLACE STRUCTURE is a method in which we place several layers and patterns of carbon fiber weave in the most efficient way possible to optimize the balance and the strength in relation to the target weight. Different layups of carbon fiber are used for different models, and the balance, strength and weight are fine tuned by adding various degrees of glass fiber to the construction.

All you now need to do is decide whether you prefer the MID, REGULAR. PRO or MAX shaft model, then you are good to go.

### (H) LINIHOC

# SHAPE

Unihoc has always been synonymous with moulded shafts, breaking new ground with several important inventions over the years such as the CURVE shaft and the BAMBOO shaft. This season we add STRAIGHT EDGE and HOCKEY to the collection.

**SUPERSHAPE** is the name of the new series where we have gathered our moulded shaft models and at the same time given you the option to pick your favorite blade.

AMT AIR MOULDING TECHNOLOGY

By placing carbon fiber inside an iron moulding cavity and heating it, and subsequently injecting air, you are able to shape the shaft into very specific creations like the **EDGE** Curve, the HOCKEY shaft and the OVAL LIGHT.

# TITANSERIES

TITAN SERIES was released last season and it was an immediate success. The clean and elegant design of the shaft in combination with the possibility to choose any of our top blade models in the new super firm TITAN PP material was clearly something that many appreciated.

This year we continue down the same beaten path, and increase the possibilities by adding new shaft models to the range, as well as adding the new ICONIC blade in the setup.

Several of the most exclusive moulded shaft models are included in the TITAN SERIES, such as the new STRAIGHT EDGE as well as the popular **EDGE CURVE**.

Our new lightweight range of exclusive straight shafts, created by using SOLID BALANCE TECHNOLGY, is also featured with several models in the TITAN SERIES.

TITAN PP is a super firm blade material with low friction against the floor surface, a great option for those who want a mix of the best qualities from our other two blade types **FEATHER** PP and REGULAR PE

# COMPOSITE SERIES

Strong composite shafts with a high grade of top quality glass fiber is the key in our new COMPOSITE SERIES. This is the stick series for those who demand solid, durable sticks that offer both great touch and lasting quality.

The setup is new this year and you can now get any of our top blades to go with your chosen shaft, including the brand new ICONIC blade. The range includes our new kids and junior sticks, as well as senior models with several flex choices and blade types.

Using high-end quality in our composite sticks offer strong shafts with great touch.

The REGULAR PE blade is our most common blade type, available in soft, medium, hard.

The FEATHER PP is a lightweight blade with soft touch and high friction, available in medium.

# THE NO.1 LIGHT WEIGHT STICK IN THE WORLD

#### LIGHTER

The CARBSKIN® models are the lightest sticks in our product range. By using the thinnest possible layers of woven carbon fiber in a completely new layup structure we have been able to reduce the weight at the same time as we have enhanced the structure of the shaft.

COLUMN PROPERTY.

#### FASTER

Our work to maximize the performance of our carbon fiber technology has led to the construction of the CARBSKIN® weave, which allows us to build shafts with a more stable and consistent construction throughout the entire shaft. This solid construction creates a faster rebound of the shaft during the shot movement.

#### STRONGER

The new construction process creates better consistency and strength in the physical properties of the shaft which dramatically improves the performance, and especially the balance. The shafts are more consistently built from tip end to butt end, and the reduction of vibrations in the shaft is fantastic.

POWERED BY CARBSKIN®

UNIHOC.COM

# CARBSKIN®

**CARBSKIN®** is the name of our most exclusive woven carbon fiber technology and it is pushing the benchmark of lightweight sticks to a totally new level in terms of required shaft properties. Utilizing a new cutting-edge layup structure for the construction of these shafts, and combining it with a thinner material, we have managed to improve the strength and durability to unmatched levels in the lightweight segment.

#### LIGHTER

The CARBSKIN® models are the lightest sticks in our product range. By using the thinnest possible layers of woven carbon fiber in a completely new layup structure we have been able to reduce the weight at the same time as we have enhanced the structure of the shaft.

### HUNIHOC

# CARBSKIN® CURVE 1.0

This year we introduce a new Curve angle, as well as the new ICONIC blade, in our CARBSKIN® range. The new CARBSKIN® Curve 1.0 stick models are the lightest Curve sticks on the market, and they offer the same great features as the straight **CARBSKIN®** sticks with unparalleled balance and fantastic kick in the rebound. In addition to this, the strength and stability of the shafts have also been pushed to new impressive levels.

#### LIGHTER

The CARBSKIN® models are the lightest sticks in our product range. By using the thinnest possible layers of woven carbon fiber in a completely new layup structure we have been able to reduce the weight at the same time as we have enhanced the structure of the shaft.

# BLADES

Choosing the right blade is equally important as choosing the right shaft, as the blade is the actual connection between the player and the ball. Having the right blade for your playing style is crucial and you need to make sure that the pre-hook, concavity and plastic type of the blade are carefully selected.

The **REGULAR PE** blade is our most common blade type, available in soft, medium. hard.

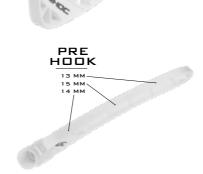

The **FEATHER PP** is a lightweight blade with soft touch and high friction, available in medium.

TITAN PP is a super firm blade material with low friction against the floor surface.

ICONIC is the brand new shooting blade from Unihoc. This is the most aggressive blade in our collection, totally focused on optimizing the shooting qualities of the players. The blade has a distinctive concavity along the entire playing surface, starting immediately at the heel of the blade and running all the way to the tip. This concavity improves the ball handling by giving a great grip on the ball, and at the same time it adds extra power in the shot release.

# (H) LINIHOC GOALIE

GOALIE

Over the years, Unihoc has been setting the standards for the most elaborate goalie gear available. Developing the right equipment for elite goalies as well as for goalies that merely play for the sake of exercise has been equally important. The range offers all the necessary items for a goalie, with several exciting alternatives to choose from in each segment.

### INFERNI

INFERNO is the Unihoc premium goalie model. This is an exclusive goalie set with lots of accessories and details for the most advanced goalies. Only high-end materials and fabrics have been used, such as durable Cordura fabric on the knees.

#### KEEPER

KEEPER is the latest addition to our goalie range. These are stylish goalie sets with exclusively selected lightweight materials for a great feeling on the playing field.

# BAG5

Bags are an important part of a floorball player's equipment and we have lots of options to choose from, including stick covers and toolbags but also regular sport bags of different sizes.

### TACTIC

The TACTIC line is an elegant option for those who want a good looking bag range with lots of practical cases and compartments.

The new ECO stick covers are produced in recycled fabric, to offer an eco-friendly option to carry your sticks.

# SUBLIMATION

Now you can customize your own unique design for the Miami set and the new Phoenix set by using sublimation technology. This means that you can create your team´s match set exactly as you want it in terms of colours, logos, player names and numbers. The design is sublimated into the fabric, which gives a soft garment without any printed transfers on it.

# APPAREL

Getting suited up with the right stuff is an important part of being in a floorball team. Our players and teams have a wide range of apparel to choose from, from both the on-court and the off-court product range.

#### TEAMWEAR

garments to choose from. We offer several styles of both match and practice kits, including sublimated garments with customized design.

#### OFF-COURT

It is equally important to look good off the field, and therefore our off-court range features many types of garments to make sure that our players and teams have a great look.

The U5 PRO MidCut is our exclusive knitted mid-cut shoe and this is a model that is completely different compared to all other floorball shoes. The shoe is designed to fit the foot like a sock and the feeling when wearing it is extremely comfortable. This shoe model features a new mid-cut elastic collar for a more locked-down fit which really hugs the foot and gives a great feeling of stability and an increased awareness of the body's movements and interaction with the floor.

U5 PRO MIDCUT WOMEN

WHITE SIZES 36-42 ART.NO 27530

STABILITY LIGHTWEIGHT CUSHIONING 

The **U5 PRO** is a robust shoe type that fills the last missing gap in our shoe collection by offering a very stable outsole with increased cushioning in combination with a solidly built upper. The upper construction has been designed to offer extra support for players who demand the utmost of their shoes in terms of strength and stability. Also the insole has been modified and given added cushioning to create an allaround strong shoe with great comfort and fit.

UNIHOC.COM

The **U4 PLUS** is a light performance shoe especially designed for floorball. The upper construction is made of breathable mesh for added comfort and cooling, and in combination with the printed hotmelt areas it gives a very modern floorball shoe with an optimized fit. This technically crafted shoe offers all the benefits that a floorball shoe needs, such as low weight, excellent medial and lateral support, as well as great durability.

U3 ELITE is a classic shoe model developed with strength and stability in focus. Strong micro fiber mesh has been used for the upper construction to give breathability and low weight, and in combination with a robust layer of PU the shoe is certain to offer both durability and comfort to match the high demands of the floorball game. The added U-frame along both sides ensures a strong construction and stability.

SUPPLICATION

66 | (H) **LINIHOC** #UNIHOC (H) **LINIHOC** | 67 UNIHOC.COM

The **U4 GOALIE** shoe model is one of our bestsellers and it has STABILITY been developed with mobility and comfort in mind. A combination of very strong and durable materials has been put together to create the perfect lightweight shoe for the modern goalkeeper. The shoe is loaded with several special features such as the Slide Control Area, the Flexi Shank and the Lace Cover System.

LIGHTWEIGHT CUSHIONING 

U5 PRO JUNIOR is the junior version of the U5 PRO model, with the same outlook and design as presented on the senior model but with a slightly modified construction to suit the younger players in both design and price level. The comfort has been put in focus and we have used exclusive lightweight materials to make the shoe both stable and comfortable to wear. The EVA midsole gives great cushioning and in combination with a high quality rubber outsole for excellent grip the result is perfect for a high level junior floorball shoe.

STABILITY

LIGHTWEIGHT

The U3 JUNIOR indoor shoe is the perfect model for the youngest players. This is takedown version of the U3 ELITE senior model, offering a more basic version for the junior players but still keeping a similar design. The rubber outsole and the moulded EVA insole give both comfort and stability on the court. The outsole is made of non-marking rubber with excellent grip on the playing field.

STABILITY LIGHTWEIGHT CUSHIONING 

The **U3 RUNNER TRX** is a comfortable and breathable running shoe, offering plenty of guidance for runners with a neutral gait. It has an all black and sleek design with matt finish which is just as perfect for the workout in the gym or for the morning run as it is for the casual everyday wear in school or at work. It fits the foot very comfortably and it has an exclusive moulded insole for improved cushioning and comfort.

# BASIC

The UNIHOC BASIC COLLECTION is created to help spreading this fantastic sport across the globe. The floorball sport is getting more and more recognized and widespread each year and to be able to supply the new floorball markets with a suitable type of equipment to get the game going we have developed a range of products that is perfect for this purpose.

Everything from goals, rinks, balls and entry level stick models are available with several options to choose from.

#### PLAYER 34

Junior stick with a soft composite shaft, and it is equipped with the popular PLAYER blade. This blade is easily playable thanks to its small pre-hook and limited concavity, which helps the ball handling and the passing qualities.

#### STREET

STREET is the perfect stick for playing floorball outdoors. We have created a well-balanced and durable floorball stick with an extra tolerant blade in nylon material, which is much more sustainable compared to other blade materials. This will make the stick a long-runner when playing outdoors on rough surfaces such as asphalt or concrete. This stick is perfect for schools where the sticks often are used outdoors in different conditions.

#### PREMIUM

The PREMIUM rink sets a new standard for floorball rinks in terms of sustainability, materials and design. We have gathered a lot of information from our teams and federations to create the best floorball rink out there. The demands are always increasing along with the growth of the sport, and that is why we are very proud to present this high end rink to the market. The rink has 6 mm thick walls made of polypropylene (PP) plastic material. The PREMIUM rink model comes with substitution zones clearly marked in white top rail colour:

#### RINK PREMIUM

BLACK COMPLETE 40x20M ART.NO: 57950 BLACK COMPLETE 24x14M ART.NO: 57951

Rink can be customized according to required measurements.

#### RINK PREMIUM SPLIT SYSTEM

The SPLIT SYSTEM™ is developed as a complement to the PREMIUM and BASIC rinks, to make it possible to divide the gymnasium into several smaller playing fields. The SPLIT SYSTEM™ consists of 4 pcs of corner parts, 14 pcs of 2.5m parts and 2 pcs of 1.5m parts (40x20m rink). A full-size playing field can thus be divided into 3 smaller fields as illustrated above. Art.no: 57980

#### BASIC

The BASIC sets a new standard for floorball rinks in terms of sustainability, materials and functionality. This BASIC rink model has slightly thinner walls than the PREMIUM model, which gives it not only a reduced weight but also a lower price. This rink model comes in solid black colour with no deviating contrast colour for the substitution zone top rails.

#### RINK BASIC

BLACK COMPLETE 40x20M ART.NO: 57955 BLACK COMPLETE 24x14M ART.NO: 57956

Rink can be customized according to required measurements.
