## SEASON 2021-2022

**NEW SEASON MEANS NEW STUFF!** This year we are adding loads of new hot products in all categories and we are launching a collection that is more exciting than ever before. We are continuing our quest to make our products more **ECO**-friendly and as an example of this we are presenting a new complete bag line for which the main fabric has been produced from recycled plastic bottles. We are also releasing our big selling blades **ICONIC** and **EPIC** in a plastic material that is 100% recycled.

But that's not all. The goalies will also have a lot of new stuff to look forward to, such as the new exclusive **ALPHA** goalie line that features both a brand new helmet model and a completely new goalie set made of top-of-the line materials like Cordura, Coolmax and YKK zippers. To top it off, we are also presenting a new design for our goalie shoes to match the new **ALPHA** gear.

In the stick segment we are happy to present a new collection of the popular **SUPERSKIN, SUPERSHAPE** and **TITAN SERIES** sticks, where we continue to build on the success from the previous season. We are also adding a brand new shoe model called the **UG COURT**, with a great fit and added cushioning for better oncourt performance.

**REPLAY LINE** is our new bag series, for which recycled plastic bottles have been used to produce the main fabric.

PLEASE NOTE THAT THE PRODUCTS PRESENTED IN THIS WORKBOOK MIGHT BE SUBJECT TO CHANGE AND/OR CANCELLATION DUE TO THE ONGOING COVID-19 PANDEMIC. The new **UB COURT** shoe model is the perfect floorball model with great stability and low weight in combination wit great cushioning.

NIHOC 05

## CARBSKIN® CURVE 1.0 WEIGHTLESS EDITION

## THE LIGHTEST CURVE IN THE WORLD JUST GOT LIGHTER!

Last season we introduced the CARBSKIN® CURVE 1.0 stick models, the lightest Curve sticks on the market. This year we are going even lighter when we introduce the CARBSKIN® Curve WEIGHTLESS EDITION, reaching a completely new level of lightweight curve sticks. Utilizing a new layup structure for the carbon fiber has enabled us to cut further weight and still keep the great balance, strength and stability of these high-end shafts. Never before has a curve stick felt so light, yet so steady.

## INTRODUCING CARBSKIN® ICE TURQUOISE

Our most exclusive stick series just became even more exclusive. For the first time we introduce **CARBSKIN®** models with a shiny shaft finish, and this time we have added an ice turquoise color tone to the actual carbon weave for a very rare and beautiful look. Spin it around in the light and watch the color tones shimmer elegantly in a perfect match with the new ice turquoise blade color.

The **CARBSKIN**<sup>®</sup> models are the lightest sticks in our product range. By using the thinnest possible layers of woven carbon fiber in a completely new layup structure we have been able to reduce the weight at the same time as we have enhanced the structure of the shaft.

## FASTER

Our work to maximize the performance of our carbon fiber technology has led to the construction of the **CARBSKIN**® weave, which allows us to build shafts with a more stable and consistent construction throughout the entire shaft. This solid construction creates a faster rebound of the shaft during the shot movement.

## STRONGER

The new construction process creates better consistency and strength in the physical properties of the shaft which dramatically improves the performance, and especially the balance. The shafts are more consistently built from tip end to butt end, and the reduction of vibrations in the shaft is fantastic.

## SUPE

When the **SUPERSKIN** stick series was launched last year it was an immediate success, for the first time offering the possibility to pick the shaft of your choice from several weight and price categories within the same stick series. This concept features the Solid Balance Technology shaft system which aims to give you a wide range of options from which you can choose your own perfectly balanced stick in all weight categories without sacrificing stability, strength and quality. These are keywords that have always been extremely important for Unihoc and this setup makes it easy to get an overview of the available shaft options. All you have to do is decide which shaft model you prefer and pick the blade of your choice.

The production method used is called **MULTILAYER INTERLACE STRUCTURE** and it is a process in which we place several layers and patterns of carbon fiber weave in the most efficient way possible to optimize the balance and the strength in relation to the target weight. Different layups of carbon fiber are used for different models, and the balance, strength and weight are fine-tuned by adding various degrees of glass fiber to the construction.

All you now need to do is decide whether you prefer the **MID**. **REGULAR**, **PRO** or **MAX** shaft model, then you are good to go.

### **STICKS**// SUPERSKIN SERIES

LINIHOC 13

### **STICKS**// SUPERSKIN SERIES

BUNHOC

Ever since we released the first **BUBBLE** shaft Unihoc has always been synonymous with moulded shafts, setting the benchmark with several important inventions over the years such as the CURVE shaft and the BAMBOO shaft. SUPERSHAPE is the name of the stick series where we have gathered our moulded shaft models and at the same time given you the option to pick your favorite blade. This year we are adding several OVAL options in the collection, together with a range of various **CURVE** shafts.

[AMT] AIR MOULDING

By placing carbon fiber inside an iron moulding cavity and heating it, and subsequently injecting air, you are able to shape the shaft into very specific creations like the **CURVE** shaft, the **HOCKEY** shaft and the **OVAL LIGHT** shafts.

# TITAN SERIES

This season the popular **TITAN SERIES** has a new look. We have kept the clean and elegant design of the shaft but we have altered the graphics to create a new futuristic look that goes hand in hand with out other stick series. The modern design in combination with the possibility to choose any of our top blade models in the super firm **TITAN PP** material has established this stick range as one of our most popular lines. This year we have added new shafts to the range and we are now offering options from the **SUPERSKIN** series as well as from the **SUPERSHAPE** series.

## РР

**TITAN PP** is a super firm blade material with low friction against the floor surface, a great option for those who want a mix of the best qualities from our other two blade types **FEATHER PP** and **REGULAR PE**.

SBT SOLID BALANCE TECHNOL
---------------------------------

Our lightweight range of exclusive straight **SUPERSKIN** shafts, created by using **SOLID BALANCE TECHNOLOGY**, is featured with several models in the **TITAN SERIES**.

[AMT] AIR MOULDING TECHNOLOGY

The TITAN SERIES is featuring the classic CURVE shaft for the coming season.

## /// EPIC TITAN SUPERSKIN PRO 29

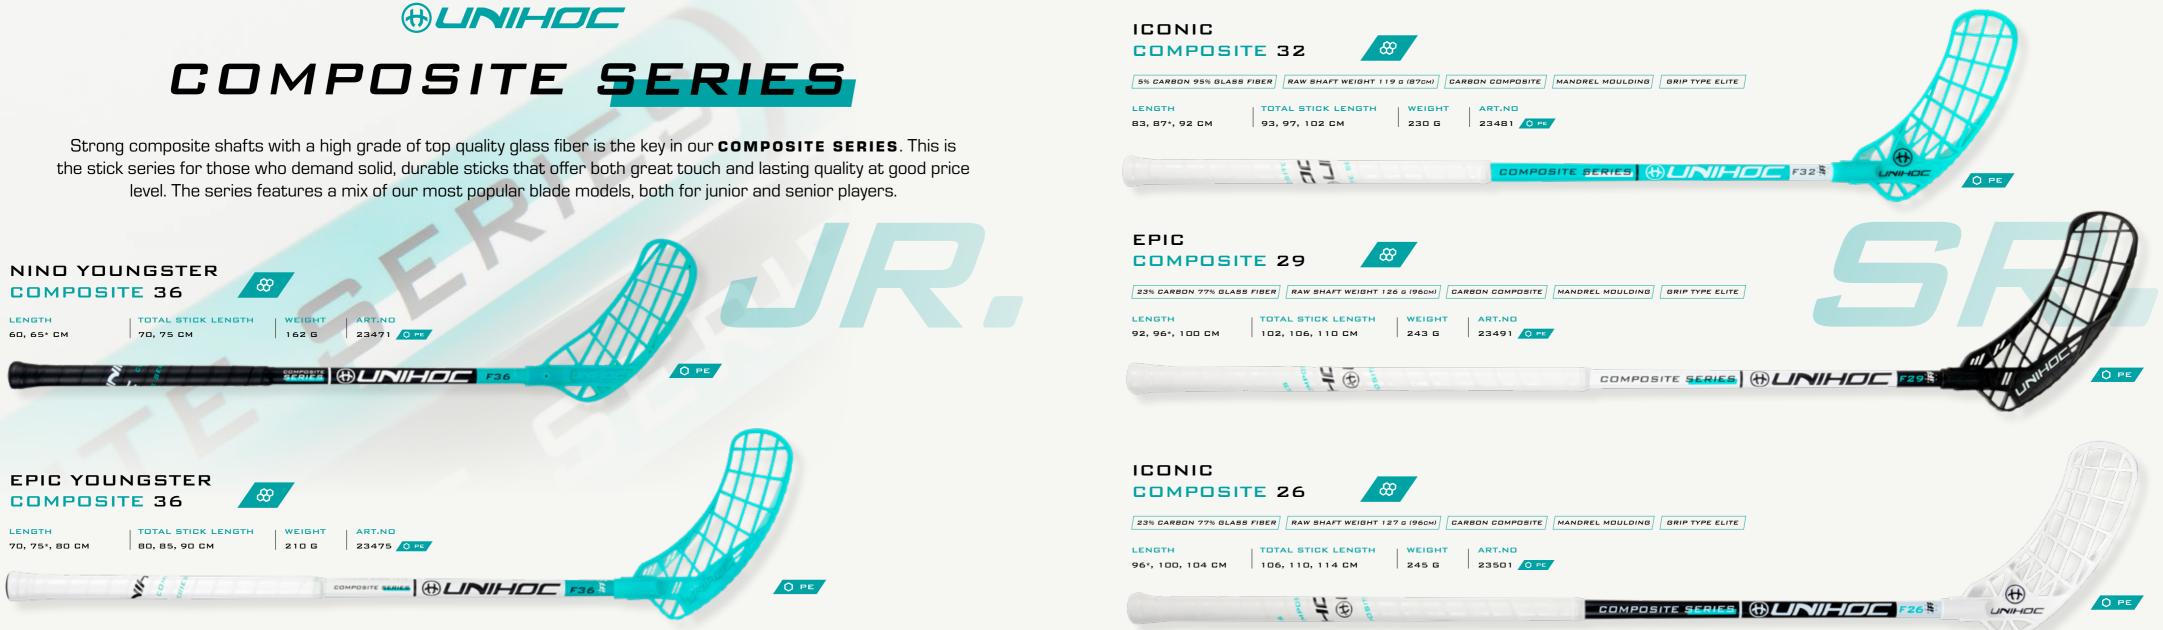

level. The series features a mix of our most popular blade models, both for junior and senior players.

*LINIHOC* 25

# 2021-2022 BLADES

This year we are adding several new options to choose from in our blade range, such as the new Ice Turquoise blade in both **REGULAR PE** and **FEATHER PP**. But maybe the most important addition is that we are now for the first time offering our own **ECO** blade, produced entirely from recycled PE plastic and without any added print color.

# BLADES

Choosing the right blade is equally important as choosing the right shaft, as the blade is the actual connection between the player and the ball. Having the right blade for your playing style is crucial and you need to make sure that the **PRE-HOOK**, **CONCAVITY** and **PLASTIC TYPE** of the blade are carefully selected.

The **REGULAR PE** blade is our most common blade type, available in soft, medium, hard.

NHDC

The FEATHER PP is a lightweight blade with soft touch and high friction, available in medium.

TITAN PP is a super firm blade material with low friction against the floor surface.

## 

· (x)

ICONIC is the new shooting blade

from Unihoc. This is the most aggressive blade in our collection, totally focused on optimizing the shooting qualities of the players. The blade has a distinctive concavity along the entire playing surface, starting immediately at the heel of the blade and running all the way to the tip. This concavity improves the ball handling by giving a great grip on the ball, and at the same time it adds extra power in the shot release.

## FOOTWEAR

**UNIHOC SHOES** is a growing category in our product range and we have over the last seasons established ourselves as a premium shoe brand with a complete range of shoes developed for the modern floorball player. Our various shoe models have been developed to offer great fit and comfort in combination with stability and perfect grip, these are the keys to a successful shoe range that has something to offer for all types of players.

**SUPtraction** is a durable non-marking rubber blend optimized for perfect grip on court surfaces.

70 *LINIHOC* 

The new **UG COURT** shoe model is the perfect floorball model with great stability and low weight in combination with great cushioning. The new upper has been designed to offer a fantastic fit when you slide the shoe onto your foot and to give a great stability and cushioning. Both the medial and lateral sides of the upper are using modern lightweight materials that offer strength as well as comfort along the entire foot.

### **UNIHOC SHOES**

The **U5 PRO** is a robust shoe type that offers a very stable outsole with increased cushioning in combination with a solidly built upper. The upper construction has been designed to give extra support for players who demand the utmost of their shoes in terms of strength and stability. Also the insole has been modified and given added cushioning to create an all-around strong shoe with great comfort and fit.

**US PRO JUNIOR** is the junior version of the US PRO model, with a similar outlook and design as presented on the senior model but with a slightly modified construction to suit the younger players in both design and price level. The comfort has been put in focus and we have used exclusive lightweight materials to make the shoe both stable and comfortable to wear. The EVA midsole gives great cushioning and in combination with a high quality rubber outsole for excellent grip the result is perfect for a high level junior floorball shoe.

### **UNIHOC SHOES**

STABILITY

The **U4 PLUS** is a light performance shoe especially designed for floorball. The upper construction is made of breathable mesh for added comfort and cooling, and in combination with the printed hotmelt areas it gives a very modern floorball shoe with an optimized fit. This technically crafted shoe offers all the benefits that a floorball shoe needs, such as low height, excellent medial and lateral support, as well as great durability.

### **UNIHOC SHOES**

STABILITY LIGHTWEIGHT CUSHIONING 

The Unihoc goalie shoes are very popular and ever since we introduced them in our collection they have been one of our bestseller each year. Therefore, it is exciting to present a new design for coming season, when we introduce the new **UX GOALIE** model. This is a modern goalie shoe that has been developed with mobility and comfort in mind. The new shoe has been developed as a combination of very strong and durable materials to create the perfect lightweight shoe for the modern goalkeeper. The shoe is loaded with several special features such as the Slide Control Area, the Flexi Shank and the Lace Cover System. The dual outsole system makes the shoe very versatile and with a brand new design that will match any goalie set the new **UX GOALIE** model is sure to be a corner stone in our shoe collection.

U4 GOALIE BLACK

SIZES 36-47 ART.ND 27301

The U4 GOALIE shoe model is one of our bestsellers and it has been developed with mobility and comfort in mind. A combination of very strong and

durable materials has been put together to create the perfect lightweight shoe for the modern goalkeeper. The shoe is loaded with several special features such as the Slide Control Area, the Flexi Shank and the Lace Cover System.

#### **UNIHOC SHOES**

STABILITY LIGHTWEIGHT CUSHIONING 

The **U3 JUNIOR** indoor shoe is the perfect model for the youngest players. This is a classic shoe model developed with strength and stability in focus. Strong micro fiber mesh has been used for the upper construction to give breathability and low weight, and in combination with a robust layer of PU the shoe is certain to offer both durability and comfort to match the high demands of the floorball game. The added U-frame along both sides ensures a strong construction and stability. The rubber outsole is made of non-marking rubber with excellent grip on the playing field.

## NEON GREEN

### UNIHOC SHOES

**U3 ELITE** is a classic shoe model developed with strength and stability in focus. Strong micro fiber mesh has been used for the upper construction to give breathability and low weight, and in combination with a robust layer of PU the shoe is certain to offer both durability and comfort to match the high demands of the floorball game. The added U-frame along both sides ensures a strong construction and stability.

### **UNIHOC SHOES**

STABILITY

The **U3 RUNNER TRX** is a comfortable and breathable running shoe, offering plenty of guidance for runners with a neutral gait. It has an all black and sleek design with matt finish which is just as perfect for the workout in the gym or for the morning run as it is for the casual everyday wear in school or at work. It fits the foot very comfortably and it has an exclusive moulded insole for improved cushioning and comfort.

## FLOORBALL **RINK** PREMIUM

The **PREMIUM RINK** sets a new standard for floorball rinks in terms of sustainability, materials and design. We have gathered a lot of information from our teams and federations to create the best floorball rink out there. The demands are always increasing along with the growth of the sport, and that is why we are very proud to present this high end rink to the market. The rink has 6 mm thick walls made of polypropylene (PP) plastic material. The PREMIUM rink model comes with substitution zones clearly marked in white top rail colour.

## RINK PREMIUM

BLACK COMPLETE 40x20M ART.ND 57950 BLACK COMPLETE 24x14M ART.ND 57951

Rink can be customized according to required measurements

## RINK PREMIUM SPLIT SYSTEM

The SPLIT SYSTEM™ is developed as a complement to the PREMIUM and BASIC rinks, to make it possible to divide the gymnasium into several smaller playing fields. The SPLIT SYSTEM™ consists of 4 pcs of corner parts, 14 pcs of 2.5m parts and 2 pcs of 1.5m parts (40x20m rink). A full-size playing field can thus be divided into 3 smaller fields as illustrated above. Art.no: 57980

## FLOORBALL RINKBASIC

The **BASIC** sets a new standard for floorball rinks in terms of sustainability, materials and functionality. This BASIC rink model has slightly thinner walls than the PREMIUM model, which gives it not only a reduced weight but also a lower price. This rink model comes in solid black colour with no deviating contrast colour for the substitution zone top rails.

## RINK BASIC

BLACK COMPLETE 40x20M ART.ND 57955 BLACK COMPLETE 24x14M ART.ND 57956

Rink can be customized according to required measurements.

## RINK BASIC SPLIT SYSTEM
